

Rules for Boilers and Generators Could Impact Your Facility.....

Does your facility have a boiler that burns biomass, wood, oil or coal? Do you have a generator on the premises? If so, you may be subject to the Area Source Boiler Rule or the Reciprocating Internal Combustion Engine (RICE) Rule issued by the EPA. Attend our one-hour webinar to find out how to stay in compliance and avoid fines.

What you will learn:

- Who must comply with these rules
- Important compliance dates
- Compliance requirements
- How to submit paperwork to the EPA
- Who enforces these rules

Who Should Attend?

- Environmental consultants
- Facility managers for:
 - Schools
 - Government buildings
 - Hospitals
 - Farms
 - Correctional institutions
 - Commercial businesses
 - Coal-related industries
 - Facilities with boilers that burn biomass, oil, wood or coal
 - Facilities with boilers
